

## MWWC State Operator of the Year

The purpose of the State MWWC Operator of the Year award is to recognize operators who have shown outstanding performance and dedication in their field.

The recipient is chosen from among six individuals who were selected in their own region as Section Operator of the Year.

### Guidelines

Each section of the MWWC selects Water Operator, Wastewater Operator, or both. These names, why chosen and work examples in the field of operation, maintenance, and or supervision are submitted to MWWC's central office and then are forwarded to the operator of the year committee by each Section Board Member.

The committee will be made up of the award recipients from the previous four years.

Areas of considerations are as the following but are not limited to them.

- Type of plant or system
- Operational Control
- Maintenance and repair
- Budget
- Housekeeping
- Problem Solving
- Years of Service
- Supervision

The Operator of the Year is chosen only from the operators that are submitted from the sections.

The award will be given at the MWWC's Annual Meeting during the Annual Banquet on Wednesday evening.
